SECTION 1: INTRODUCTION AND COMMITTEE MEMBERS

Performing arts centers are actively developing strategies for resuming operations and reopening their doors once they are authorized to do so. Based on extensive research and consultation with medical experts, we recognize that until a COVID-19 vaccine and/or effective therapeutics become widely available, it may be many months before we can return to the mass gathering venues that we once were. We also understand that if current social distancing measures are required or recommended as part of our reopening plans, it will be financially and/or logistically impossible for most of our venues to engage in our primary business.

Nevertheless, we believe that in order to reimagine our venues and reengage with our communities between now and when we can return to something that resembles normal operations, it is necessary to prepare for various reopening scenarios. To that end, this document has been created as a roadmap to reopening with a “menu” of mitigation measures that may or may not be appropriate for any particular venue. We recognize that the nature and timing of the reopening process and the strategies adopted by individual venues will vary based upon state and local guidelines and/or mandates and upon the unique circumstances and conditions of each venue.

Our primary goal is to provide information and resources to assist performing arts centers that accommodate 6,000 people or less in implementing a phased approach to returning to normal operations while simultaneously protecting the health and safety of our staff, guests, and artists. We assume that for the foreseeable future, “normal operations” will require venues to adopt reasonable measures that respond to the evolving circumstances surrounding the COVID-19 pandemic.

The measures that individual venues adopt to resume operations will also be influenced by factors such as the willingness of the public to return to large gatherings and to submit to the health and safety precautions that we are required to or choose to implement; the availability and requirements of our performing artists; and the feasibility, cost, and revenue impacts of

proposed health and safety measures. Any plan adopted by individual venues must address and reconcile these potentially competing factors.

In order to remain useful over the course of this pandemic and beyond, this is a living document. Our recommendations will continue to be informed by the evolving guidelines and/or mandates of governmental and scientific authorities, and we will revise and redistribute this document as necessary to reflect changing circumstances and new information. Because our recommendations are so dependent upon governmental authorities, we have worked closely with local and state agencies and representatives to ensure that the unique needs and conditions of performing arts centers are represented in the development of governmental guidelines.

As you are aware, in developing our individualized reopening plans, we are all continuing to work in an environment of uncertainty. As a result, any plans that we adopt must include flexibility and a robust communication strategy that will enable us and our guests to successfully adapt to rapidly changing circumstances.

We sincerely hope that this document will assist you in developing a viable reopening plan that is tailored to your unique venue.

PACC Advisory Committee Members

Lorin Shepard (Chair)
Chief Operating Officer
Straz Center for the Performing Arts

Todd Duesing
Vice President and COO
Cincinnati Arts Association

Josh LaBelle
Executive Director
Seattle Theatre Group

Howard Sherman
Executive Vice President and COO
The Music Center

Jeremy Shubrook
Senior Director of Operations
Adrienne Arsht Center

Ellery J. Brown
Senior Vice President of Operations
The John F. Kennedy Center for the Performing Arts

Ken Harris
Vice President, Operations
Adrienne Arsht Center

Kelley Shanley
President and CEO
Broward Center for the Arts

C.J. Marshall
Senior Director of Operations
Straz Center for the Performing Arts

Dionne Christian
Special Assistant to the COO
Straz Center for the Performing Arts

SECTION 2: SCOPE AND USE OF THIS DOCUMENT

This document has been developed in consultation with leading medical professionals and legal counsel and after careful consideration of governmental and public health guidelines to provide information and recommendations to individual performing arts venues to guide them in their reopening processes. The specific plans and measures adopted by individual venues will vary based upon governmental guidelines and/or mandates and upon the unique requirements of each venue.

In designing the risk mitigation measures outlined below, we have analyzed the exposure points and risk levels for four main categories: 1) guests, 2) visiting companies and back of house staff, 3) front of house staff, and 4) office staff. By assessing the risks for each of these categories, we believe that we have developed useful recommendations for each group that will be widely applicable to different types of performing arts venues.

Our risk/mitigation analysis focuses on the reopening process from an operations perspective and is intended to be one component of an overall performing arts center reopening strategy. As such, this document does not address other major areas of the reopening process such as:

- organizational budget issues
- programming readiness (e.g., rehearsal process, onstage performance experience)
- audience willingness to return, and
- contractual/legal issues (e.g., force majeure) that do not pertain to the mitigation measures that we are proposing.

In addition, the information and recommendations contained in this document should not be relied upon as being authorized or required by any law or regulation. We also make no representation regarding the effectiveness of any risk mitigation measure in preventing or reducing the risk of contracting or spreading COVID-19. Each venue should consult with medical professionals and its own legal counsel to assess the legality and potential risks and liabilities associated with any measures it chooses to adopt.

It is our hope that the information and recommendations provided by this committee will assist performing arts centers in protecting their staff, guests, and artists while presenting and producing economically viable events.

SECTION 3: GUIDING PRINCIPLES AND PRACTICES

- ◇ Mitigation measures must be consistent with public health guidelines and timing recommendations.
- ◇ Mitigation measures must be effective, manageable, consistent and tenable.
- ◇ Communication to staff, guests, and visiting companies must be transparent, empathetic and meaningful.
- ◇ Supply chain, including PPE, disinfectant and testing resources must be widely available and reliable to begin a phased reopening.
- ◇ Robust training and support programs must be in place to empower staff with a level of confidence to return to work.
- ◇ Expectations regarding staff, guest, and artist responsibility for adhering to the venue's guidelines must be effectively communicated.
- ◇ Venues must be prepared to assess and adjust their operations based on changing circumstances.
- ◇ Venues should support continued remote work whenever possible and limit onsite work to essential roles and responsibilities.
- ◇ Venues must remain ADA compliant when implementing mitigation measures.
- ◇ Vulnerable and at-risk staff and guests should be encouraged to stay home.

SECTION 4: COMMUNICATION STRATEGIES

Advance and onsite communications of the health and safety measures being adopted by our organizations is critical to making people feel confident enough return to our venues. It is especially important to be transparent about these health and safety measures and to clearly communicate expectations regarding staff, guest, and artist behavior upon their return to our theatres.

Communications to guests and staff should emphasize the importance of good hygiene and should clearly outline the new mitigation protocols they will encounter when attending the venue. In addition to describing screening, contact tracing, and other measures that are being implemented in accordance with public health guidelines, it is also critical to convey that venues simply cannot guarantee that all exposure to the virus will be eliminated. Disclaimer language to that effect should be included in all communications and other materials received by staff, guests, and artists.

Venues should engage their staff, guests, and visiting companies by emphasizing the importance of their role in minimizing the risk of exposure and spread of COVID-19. Staff and guests should understand our expectation that they assess their health and make responsible decisions before entering the facility. Venues should consider offering guests options regarding their ticket purchase if they are unable to attend, and these options should be communicated to guests in advance to encourage them to act responsibly.

Ultimately, the goal of our organizations should be to provide a level of transparency and openness that allows guests and staff to make informed choices about returning to our venues while not promising anything that is beyond our control.

SECTION 5: REOPENING PHASING

The following pandemic phasing model is taken directly from an April 2020 reopening roadmap developed by the John Hopkins Bloomberg School of Public Health and American Enterprise Institution. These phases should be assessed against governmental reopening mandates and/or guidelines to determine their applicability to any particular city or venue. The phases help determine the timing of and requirements for reopening certain components of our business. Some components (e.g., large theatre seating) may not be at the same phase as other components (e.g., outdoor dining). We assume all mitigation measures we adopt will occur in Phases 2 and 3.

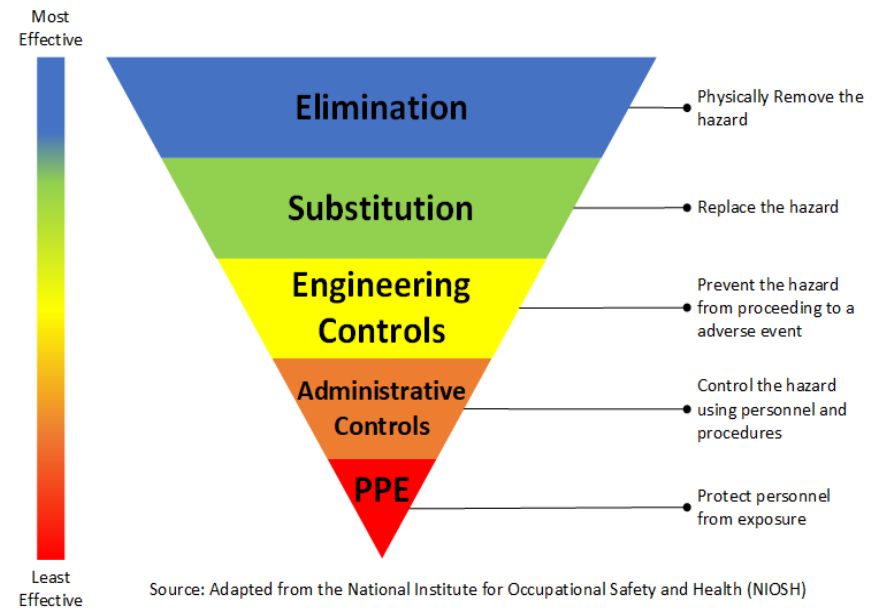

Phase 1	<ul style="list-style-type: none">• Consists of community-level physical distancing measures to “slow the spread.” In addition to asking community members to remain at home, state leaders should also use Phase 1 to increase access to diagnostic testing and increase public health and medical system capacities. These capacities are needed to safely identify and treat all COVID-19 patients and to prepare for a shift from community mitigation.
Phase 2	<ul style="list-style-type: none">• Businesses and sectors can begin a process of reopening, with modifications. Rather than asking everyone to stay home, states can limit SARS-CoV-2 transmission through a combination of physical distancing and case-based interventions (testing, contact tracing, and self-isolation for those with active disease or individuals who may have contracted SARS-CoV-2 and are awaiting test results), which in most places may require an expanded workforce and resources. Public hygiene will be sharply improved, and deep cleanings on shared spaces should become more routine. Shared surfaces will be more frequently sanitized, among other measures. In addition to case-based interventions that more actively identify and isolate people with the disease and their contacts, the public will initially be asked to limit gatherings, and people will initially be asked to wear fabric nonmedical face masks while in the community to reduce their risk of asymptomatic spread. Those who are sick will be asked to stay home and seek testing for COVID-19. Testing should become more widespread and routine as point-of-care diagnostics are fully deployed in doctors’ offices.
Phase 3	<ul style="list-style-type: none">• Phase 3 looks ahead to a time when an effective therapeutic or vaccine is available. Physical distancing restrictions and other Phase 2 measures can be lifted when safe and effective tools for mitigating the risk of COVID-19 are available, including broad surveillance, therapeutics that can rescue patients with significant disease or prevent serious illness in those most at risk, or a safe and effective vaccine.

SECTION 6: MITIGATION PRINCIPLES

EFFECTIVE USE OF MITIGATING CONTROL STRATEGIES

Controlling exposures to occupational hazards is a fundamental way to protect personnel. Conventionally, a hierarchy has been used to achieve feasible and effective controls. Multiple control strategies can be implemented concurrently and or sequentially. This hierarchy can be represented as follows:

- Elimination
- Substitution
- Engineering controls
- Administrative controls
- Personal protective equipment (PPE)

EMPLOYEE RISK CATEGORY

In the COVID-19 context, OSHA has classified jobs into four risk exposure categories. Performing arts center jobs would fall into the medium exposure risk category as defined below (the high exposure risk category is reserved for jobs such as healthcare delivery and support staff that involve potential exposure to known or suspected sources of COVID-19):

“Medium exposure risk jobs include those that require frequent and/or close contact with (i.e., within 6 feet of) people who may be infected with SARS-CoV-2, but who are not known or suspected COVID-19 patients. In areas without ongoing community transmission, workers in this risk group may have frequent contact with travelers who may return from international locations with widespread COVID-19 transmission. In areas where there is ongoing community transmission, workers in this category may have contact with the general public (e.g., schools, high-population-density work environments, some high-volume retail settings).”

The complete OSHA guidelines for preparing workplaces is available here: [Worker Exposure Risk to COVID-19](#)

MEDIUM RISK EMPLOYEE PPE REFERENCE STANDARDS

Under OSHA guidelines, mitigation measures for workers in medium risk category jobs as defined above will vary based on work task. Accordingly, PPE ensembles for workers in the medium risk category will vary by work task, the results of the employer’s hazard assessment, and the types of exposures workers have on the job. PPE ensembles may include some combination of face masks, gloves and gowns. Respirators (N95 or KN95) should not be required except in rare situations or for other non-coronavirus activities that would otherwise require them.

RISK EXPOSURE LEVELS FOR PERFORMING ARTS CENTER TASKS AND ACTIVITIES

Within the medium risk category established by OSHA, we recognize that in the performing arts center context, certain tasks and activities pose a greater risk of exposure to COVID-19 than others (e.g., valet parking versus processing ticket transactions behind a partition). In order to classify these relative risk levels, we have developed the following categories based on the effectiveness of primary mitigation measures for certain tasks and activities:

Level 1	<ul style="list-style-type: none"> • Social distancing measures can be maintained or controlled • Physical exchange of contaminated material is minimal and can be limited or controlled through safe handling
Level 2	<ul style="list-style-type: none"> • Social distancing measures can be suggested, but potentially not controlled • Physical exchange of potentially contaminated material can be limited or controlled through safe handling • Person to person contact can largely be avoided
Level 3	<ul style="list-style-type: none"> • Social distancing measures CANNOT be adhered to <p style="text-align: center;">OR</p> <ul style="list-style-type: none"> • Physical exchange of potentially contaminated material CANNOT be limited or controlled through safe handling practices <p style="text-align: center;">OR</p> <ul style="list-style-type: none"> • Mitigation controls are untenable

PERFORMING ARTS CENTER CONSORTIUM
 ADVISORY COMMITTEE ON REOPENING
SECTION 7: RISK ASSESSMENTS

This section presents generic Risk Assessments for dealing with the current COVID-19 situation in the performing arts center environment. It is not likely to cover all scenarios, and each venue should consider its own unique circumstances. This risk assessment is focused exclusively on mitigating the spread of COVID-19 in four experience categories: Guest, Visiting Companies & BOH Staff, FOH Staff, and Office Staff.

Guest - Risk Assessment

Guest Experience	Exposure Level	Phase	Potential Mitigating Controls	Impact
<i>SELF-PARKING</i>	Level 2	Phase 2	<ul style="list-style-type: none"> • Provide parking attendants appropriate PPE • Install self-service pay machines where available • Expand prepay parking options to eliminate onsite transaction • Encourage cash-free payments – cards preferred • Disinfect card readers regularly • Install social distancing controls in pedestrian areas (stairwells, elevators, corridors) • Disinfectant wipes/sanitizer available to guests at touch points (parking machine, elevator landings) • Encourage routine employee hand washing • Establish employee health tracking system 	<ul style="list-style-type: none"> • Slower ingress • PPE expense • Additional staffing costs • Equipment expense
		Phase 3	<ul style="list-style-type: none"> • Encourage routine employee hand washing • Install self-service pay machines where available • Encourage cash-free payments – cards preferred • Disinfect card readers regularly 	

PERFORMING ARTS CENTER CONSORTIUM
 ADVISORY COMMITTEE ON REOPENING

VALET PARKING	Level 3	Phase 2	<ul style="list-style-type: none"> • Suspend Valet Parking 	<ul style="list-style-type: none"> • Valet service suspended <p style="text-align: center;">OR</p>
		Phase 3	<ul style="list-style-type: none"> • Provide valet drivers appropriate PPE • Drivers should wash or sanitize hands between each vehicle • Install sneeze guard at payment station • Encourage cash-free payments – cards preferred • Discontinue door opening procedures and hand-to-hand key exchange • Disinfect high touch surfaces in each vehicle upon entry • Encourage routine hand washing by employees • Install floor markings for safe distancing • Reconfigure queuing area for egress or designate valet waiting (guests recalled when their vehicle is delivered) • Establish employee health tracking system 	<ul style="list-style-type: none"> • Capacity/speed greatly reduced • Exposure potential remains high • PPE expense • Additional staffing costs

PERFORMING ARTS CENTER CONSORTIUM
 ADVISORY COMMITTEE ON REOPENING

TICKET SERVICES/ BOX OFFICE	Level 1	Phase 2	<ul style="list-style-type: none"> • Provide ticket agents appropriate PPE • Protective barriers installed in open ticket windows • Contactless ticket options – Concerted effort to increase E-ticket use • If possible, relocate printers to allow guests to retrieve tickets directly from the printer. Tickets printed on demand • Encourage cash-free payments – cards preferred • Install guest-operated card readers where possible • If employees handle credit cards, they should wear gloves and disinfect cards pre/post each transaction • Encourage routine hand washing by employees • Install social distancing controls for queuing • Disinfectant wipes/sanitizer available to guests at touch points (queue, teller windows) • Encourage guests to pick up tickets in advance of performance date • Establish will-call pickup time slots to control peak traffic • Clean and disinfect ticket office/call center daily • Establish employee health tracking system • Develop and implement guest questionnaire to aid in identifying symptoms and to participate in contact tracing 	<ul style="list-style-type: none"> • PPE expense • Additional staffing costs • Infrastructure expense (sneeze guards, POS equipment modifications, queuing modifications)
		Phase 3	<ul style="list-style-type: none"> • Disinfectant wipes/sanitizer available to guests at touch points (queue, teller windows) • Encourage guests to pick up tickets in advance of performance date • Encourage cash-free payments – cards preferred • Establish will-call pickup time slots to control peak traffic • Encourage routine hand washing by employees • Spray and disinfect ticket office/call center daily 	

PERFORMING ARTS CENTER CONSORTIUM
 ADVISORY COMMITTEE ON REOPENING

SECURITY SCREENING	Level 3	Phase 2	<ul style="list-style-type: none"> Provide security staff appropriate PPE Implement contactless temperature screening process Develop and implement guest questionnaire to aid in identifying symptoms and to participate in contact tracing Be prepared to provide face coverings to guests who arrive without or who damage/lose while onsite Reconfigure queuing area and install floor markings to enforce social distancing Eliminate secondary hand scanning; require guests to empty pockets and walk through again Implement clear bag policy; 12x12 clear bags can be inspected without the need to hand over to screener See NFL bag policy Review screening area configuration to allow greater distance between guest and employee --if secondary inspection is required, provide location for guest to remove contents of bag; ensure no direct contact with guest or bag Disinfect equipment daily/per performance Set up disinfecting station for guests to clean bags immediately after screening Establish protocols/parameters for refusing entry based on observed symptoms Establish employee health tracking / questionnaire system Routine testing for staff if/when available 	<ul style="list-style-type: none"> PPE expense Slower guest throughput Additional staffing costs Infrastructure expense (sneeze guards, thermal imaging technology, queuing modifications) Space limitations may negate social distancing guidelines Routine staff testing expense
		Phase 3	<ul style="list-style-type: none"> Set up disinfecting station for guests to clean bags immediately after screening Continue clear bag policy; 12x12 clear bags can be inspected without the need to hand over to screener See NFL bag policy Review screening area configuration to allow greater distance between guest and employee --if secondary inspection is required, provide location for guest to remove contents of bag; ensure no direct contact with guest or bag Maintain protocols for refusing entry based on observed symptoms 	

PERFORMING ARTS CENTER CONSORTIUM
 ADVISORY COMMITTEE ON REOPENING

TICKET SCANNING / BUILDING ENTRY	Level 3	Phase 2	<ul style="list-style-type: none"> Provide ticket takers appropriate PPE Guests should be instructed to wear face coverings inside at all times Implement assigned entry door #s to reduce crowds at main doors Install social distancing controls for queuing Adopt touchless ticket scanning -- guest retains ticket or electronic device during scanning Encourage routine hand washing by employees Relocate scanning locations away from doorway to increase distancing Establish employee health tracking system Disinfectant wipes/sanitizer available to guests at touch points 	<ul style="list-style-type: none"> PPE expense Slower guest throughput Additional staffing costs/ staffing shortage in volunteer operations (demographic at high risk) Infrastructure expense (sneeze guards, queuing modifications, self-service ticket scanners) Space limitations may negate social distancing guidelines Routine staff testing expense
		Phase 3	<ul style="list-style-type: none"> Disinfectant wipes/sanitizer available to guests at touch points Establish employee health tracking system Adopt touchless ticket scanning -- guest retains ticket or electronic device during scanning Encourage routine hand washing by employees Establish employee health tracking system 	

PERFORMING ARTS CENTER CONSORTIUM

ADVISORY COMMITTEE ON REOPENING

<i>RESTROOMS</i>	Level 3	Phase 2	<ul style="list-style-type: none"> • Provide custodial staff appropriate PPE • Establish restroom occupancy limits and entry controls (1 in, 1 out) • Disinfectant wipes/sanitizer available to guests at touch points • Temporarily close adjacent stalls and sinks to enforce social distancing • Eliminate air hand dryers in bathroom • Clean/disinfect touch points constantly during high usage • Install touch-free faucets/toilets/soap and paper towel dispensers • Assign designated restrooms to sections of theatres to control guest movement • Disinfect restrooms between rush periods (top of show, post intermission) 	<ul style="list-style-type: none"> • Slower guest throughput --extended intermission time requirements • PPE expense • Additional staffing costs • Infrastructure expense (touchless faucet, soap dispensers, and paper towel dispensers) • Space limitations may negate social distancing guidelines • Routine staff testing expense
		Phase 3	<ul style="list-style-type: none"> • Disinfectant wipes/sanitizer available to guests at touch points • Eliminate air hand dryers in bathroom • Clean/disinfect touch points constantly during high usage • Disinfect restrooms between rush periods (top of show, post Intermission) 	

PERFORMING ARTS CENTER CONSORTIUM

ADVISORY COMMITTEE ON REOPENING

<p>COUNTER SERVICE DINING & BAR SERVICE</p>	<p>Level 2</p>	<p>Phase 2</p>	<ul style="list-style-type: none"> • While guests are required to wear face coverings, consider eliminating food service altogether in interior locations or relocating to exterior locations where possible or permit indoor dining in accordance with state and local mandates or guidelines. 	<ul style="list-style-type: none"> • Slower guest throughput • Extended intermission time requirements • Reduced capacity • Reduced revenue • PPE Expense • Additional staffing costs • Infrastructure expense • Space limitations may negate social distancing guidelines • Routine staff testing expense • Supply chain concerns
		<p>Phase 3</p>	<ul style="list-style-type: none"> • Provide food service employees appropriate PPE • Reduce seating area capacity per CDC or local guidelines • Mobile ordering or pre-ordering intermission drinks -- no contact delivery • Pre-packaged container products only – guest self service • Reduce or eliminate mixed drinks and draft systems, consider premixed cocktails and bottles only; • Install sneeze guard at point of sale • Redesign cashier layout to provide greater distancing • Eliminate the need to scan individual product • Encourage cash-free payments – cards preferred • Install guest-operated card readers where possible or self-service pay stations • Install reach-in style coolers and heaters with no door opening required • Disinfectant wipes/sanitizer available to guests at touch points • Encourage routine hand washing by employees • Implement daily cleaning/disinfecting log at each location 	

PERFORMING ARTS CENTER CONSORTIUM
 ADVISORY COMMITTEE ON REOPENING

TABLE SERVICE & DINING AREAS	Level 2	Phase 2	<ul style="list-style-type: none"> While guests are required to wear face coverings, consider eliminating food service altogether in interior locations or relocating to exterior locations where possible or permit indoor dining in accordance with state and local mandates or guidelines 	<ul style="list-style-type: none"> Reduced capacity--50% or less Reduced revenue PPE expense Additional staffing costs Infrastructure expense Space limitations may negate social distancing guidelines Routine staff testing expense Disposable product cost Supply chain concerns
		Phase 3	<ul style="list-style-type: none"> Provide food service employees appropriate PPE Encourage cash-free payments – cards preferred Disinfectant wipes/sanitizer available to guests at entry and touch points Install portable hand washing sinks Seating area capacity reduced per CDC or local guidelines Switch to all disposable tableware and prewrapped cutlery Implement advance order/mobile order protocols where possible Eliminate all buffet style service (salad bar, dessert station, etc.) Switch to individually packaged items for self service Eliminate linen where possible or replace all linen after each guest; soiled linen should be treated as contaminated Do not reuse cups, mugs or souvenir cups Eliminate reusable menus and check presenter books

SECTION 8: CONCLUSION

We hope that the above roadmap will assist you in developing individualized reopening plans that protect the health and safety of your staff, guests, and artists and that allow you to conduct economically viable operations. We will update and redistribute this guide as necessary to reflect new information and changing recommendations.

We look forward to learning about your efforts and your unique responses to the conditions and requirements of your particular states and cities. And above all, we look forward to sharing the joy of bringing the magic of live theatre back to our communities.
